Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18 and 25-30, drawn to compounds and combinations of the compounds, classified in class 568, subclass 579.
 - II. Claims , drawn to method of using the compounds associated with methobлизм dysfunction, classified in class 514, subclass 576.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)).

In the instant case the method of treating metabolism dysfunction can be treated by using a materially different compound such as those benzofuran containing compounds disclosed in US 6599925.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During a telephone conversation with Burton Rodney on 5-19-04 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-19 and 25-30. Affirmation of this election must be made by applicant in replying to this Office action. Claims 20-24 withdrawn
